

Decoder directions: If you can print this out on carboard paper that is stronger. Or cut and paste to paper plates. Very carefully cut out the two circles below. You may need to purchase a brass pin for the center. You may find this under school supplies. Place the middle on top of the bottom one making sure the two holes match.

You may now place coded on your blackboard or paper with your fun coded message. The students will match up the inside number to the outside letters. The code is the letters you choose on the inside will spell out the word matching up with the outside.
