

Lesson 2 Adding 3 Fractions with unlike denominators

Name _____

Directions: Please click on the blue button above for directions and answers the problems listed below if needed.

Example 1 $\frac{1}{4} + \frac{1}{2} + \frac{1}{5} = \frac{5}{20} + \frac{10}{20} + \frac{4}{20} = \frac{19}{20}$

Example 2 $\frac{1}{3} + \frac{1}{2} + \frac{2}{4} = \frac{4}{12} + \frac{6}{12} + \frac{6}{12} = \frac{16}{12} = \frac{4}{3} = 1\frac{1}{3}$

1) $\frac{8}{13} + \frac{11}{26} + \frac{15}{26} =$

2) $\frac{1}{10} + \frac{4}{5} + \frac{11}{20} =$

3) $\frac{12}{13} + \frac{13}{26} + \frac{1}{26} =$

4) $\frac{2}{4} + \frac{5}{13} + \frac{3}{26} =$

5) $\frac{7}{11} + \frac{2}{55} + \frac{3}{55} =$

6) $\frac{3}{7} + \frac{9}{21} + \frac{6}{7} =$

7) $\frac{1}{58} + \frac{10}{29} + \frac{16}{29} =$

8) $\frac{9}{14} + \frac{1}{21} + \frac{12}{21} =$
