

Lesson 2 Adding Fractions Mixed Numbers

Name _____

Directions: If you click on one of the two above icons they will allow an instructional video to play and illustrate add mixed numbers.

Example 1

$$5\frac{3}{4} + 8\frac{2}{3} = 5\frac{9}{12} + 8\frac{8}{12} = 13\frac{17}{12} = 14\frac{5}{12}$$

Example 2

$$1\frac{1}{10} + 7\frac{1}{2} = 1\frac{1}{10} + 7\frac{5}{10} = 8\frac{6}{10} = 8\frac{3}{5}$$

1) $4\frac{2}{10} + 9\frac{2}{4} =$

4) $1\frac{2}{3} + 5\frac{3}{5} =$

2) $1\frac{1}{2} + 9\frac{1}{5} =$

5) $1\frac{1}{2} + 4\frac{2}{3} =$

3) $6\frac{2}{5} + 9\frac{1}{4} =$

6) $5\frac{2}{4} + 7\frac{7}{10} =$
