

Lesson 1 Word Problems

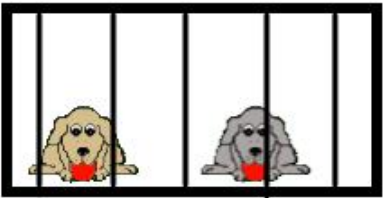

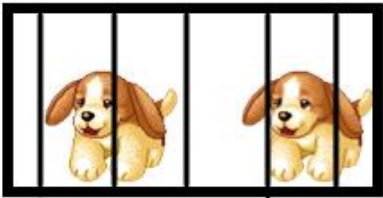

Name _____

Directions: Scan or click the button above to obtain the video for this lesson. Pause the video when asked to allowing you to then solve the math problem. You will have to pause the video several times. You will find two problems in this lesson.

1)

Billy was at the pet store looking for a puppy to bring home. He found 2 puppies in one cage and 2 more puppies in another cage. How many puppies were there total?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

2)

Carol and her brother went to the zoo. In one area of the zoo they saw 4 Giraffes. In another area they saw 1 Elephant. How many animals did they see at the zoo total?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$
