

Lesson 1: Weathering and Erosion

Name: _____ Class Period: _____

Directions: The lesson below will help you better understand the processes of weathering and erosion. If you are on a computer, clicking the button in the top right hand corner, you will be able to access a video to explain these processes. You can also use a phone or tablet to scan the QR code at the top right for a video explanation.

Weathering and erosion are very similar processes. What is the difference?

The diagrams below show the rock profiles in an area. Each diagram shows 4 different rock types in that area. Use what you know about weathering and erosion to make inferences about the geological history of that area. Record those inferences to the right of each diagram.
