

LESSON 14 HLOOKUP STEM SCHOOL STUDENTS DATA

*This is a simple **HLOOKUP** illustration of what may implemented by a school in looking up information quickly on a student. You will discover that we have placed most of the data information in the spreadsheet so that you will not have to spend a lot of time in **DATA ENTRY**. You again will only need to complete the last three equations for Phys Ed, Science and Computer Science. Look carefully at the relationship of Science. Please show me your finished spreadsheet. If you wish you may enter your own personal information.*
