

Math Picture Puzzles

This course will allow you to make a presentation for your students forcing them to look at details and solve logic problems. You may also provide them with the ability to create their own as we will provide examples lessons and an instructional video.

This course is designed to be completed in 12.5 hours or more depending on the difficulty of your lessons. You are required to create two sheets with each sheet contain 2 lessons on that sheet. The difficulty of your lesson will vary depending on the grade level you are teaching in math. Please remember you may wish to use this lesson in your classroom which will provide your students with an outstanding example of what they may do if you assign this to them.

This course is designed to provide you with an easier and fun method of teaching and assist in facilitating lessons with students that have a problem learning. You will not have a face-to-face meetings or online chat sessions with this course. The website will provide you with all the instructions necessary with an example and videos.

You will discover over time that your students will be looking forward to this lesson allowing them to fully express what they have learned if they are going to create their own lesson.

You will be provided with example lesson at various grade levels. And a power point lesson that you math change in Microsoft office or convert to Google.

I believe you will discover that none of the above is difficult but if you use this as an example for your students it will make your job not only easier but more fun.
