Quizizz Lessons

This course is designed to be completed in 12.5 hours or more depending how much time you place in designing your quizzes. Each Quiz should take about 45 minutes to design. When you create the two with your own photos these should take a little more than an hour depending on your expertise. Instructional videos with examples have been provided.

Quizizz uses game-based learning approach to inspire creation and research in students. Its game-based system is very exciting and entertaining unlike other traditional quiz procedure. Since Kahoot is a great platform for creating a fun, social and game-like environment in the classroom, teachers worldwide are using it in their classrooms. It is a very simple and easy platform allowing students to learn and have fun doing so.

Teachers will design 4 (4) lessons using Quizizz. One of the 4 must have Photos allowing the students to view the question in a different format. The minimum number of quesitons is 10 with a max of 15.

In order for me to view their lesson I must be provided with the login and password. Or if you assign it as homework just send me the code number that you would give your students. Teachers only need to send me this information though an email this iso that I am confirm their work and provide a grade.
