

“Power Point Educational Games”

All lessons should take a little over 3 hours to create for this 12.5 hour course. The length of time will be determined by your knowledge of what you are creating your power point games for and how well you are able to complete a nonlinear power point. Many examples with videos are provided.

The courses may be accessed from any Internet capable PC running Windows 98 SE or higher. It provides you the flexibility of 24-hour access, working at your own pace. There may be one face-to-face meeting with a presentation on the first day of the class depending on where you live. You are required to contact the instructor though email the same day you have started the course. You must email the **phone number** so he may be able to reach you. You will receive at least one phone call to make sure everything is going well and you understand what is expected from you in completing this course for a grade. That first phone call will save you an endless amount of time.

Registration may take place at anytime during the year. There is not a set beginning or end time. Teachers may choose to take (start) this class at any time. You will have a span of time to complete the course over three weeks from the date that you start the class and email is sent to the instructor. As a professional, you may wish to choose your **Three(3)** games assignments from anything you are teaching in your class. In reference to a rubric for this course, please do not submit anything with a perception you did it in only a few minutes with the idea of a quick credit. You will not pass the course and you will have wasted the cost of the class.

Do not have fewer than **four (4)** categories if you are working on the Jeopardy Power Point. Since you are a professional the other Games should be designed to cover your subject. They however should not be less than **10 questions**. You will discover that they are very easy to create just follow the examples as a template.

If you need assistance with an idea I am more than willing to work with you. You are required to email me the following information asked to earn credit: **PLEASE READ PLEASE READ PLEASE READ BELOW!** You must submit to me your three (3) lessons using the power point examples that I have illustrated. **YOU MUST SAVE YOUR LESSONS USING UNIQUE NAMES (CALL THE POWER POINT WHAT IT IS COVERING)**. This will allow me to easily classify and save your work for other teachers to use.

You will find “**user-friendly**” digital videos explaining how to use each Power Point example.

When I witness that all lessons created by you are successfully completed, I will submit your passing grade to Ashland that same day.

Regards,
Dan Hoffman
