

Creating A QR Code Lesson

CREATING QR CODE USING WORD

1. Open up word 2010 or newer
2. Hit your enter key 4 times to create a buffer
3. Insert word art at the top or type in a heading of your choice describing what the lesson is about.
4. Click on the tab that says Page Layout
 - a. Page Color - Fill Effects- Texture - Stationary
 - b. Do not choose a color for a background
 - c. Background needs to be easy to read.
 - d. Change margins or paper orientation if necessary.
5. Create a table to place your questions in or math problems.
THIS IS OPTIONAL.
6. Design your lesson.
7. Click on the link that creates a QR code.
 - a. Place your answers in the space provided to create the code
 - b. Your QR will appear.
 - c. You may double check your work by scanning the QR right now to make sure it is correct. If not make necessary corrections.

COPY QR CODE TO DOCUMENT

1. Click the download button - download QR Code as JPEG
2. Choose Open when it appears at bottom of screen
3. Click on the word File at the top menu of the QR Code window.
4. Click copy or Ctrl C to copy and then paste the QR Code in your lesson.
5. Double click the QR Code grab the handles (little circles) that appear and make the code smaller if needed.
6. Click Wrap Text and tight with the QR Code highlighted allowing you to now move the code to where you want it.
