

Subtracting Fractions

Lesson 2 Name _____

- 1) Solve each problem listed below.
- 2) When done scan in the bar code to see if you are correct.
- 3) If the denominators are the same, subtract the numerators and keep the denominator. Reduce answer if needed.

1. $\frac{17}{18} - \frac{7}{18}$

2. $\frac{4}{5} - \frac{4}{5}$

3. $\frac{37}{20} - \frac{23}{20}$

4. $\frac{13}{16} - \frac{7}{16}$

5. $\frac{9}{4} - \frac{7}{4}$

6. $\frac{29}{4} - \frac{27}{4}$

7. $\frac{7}{16} - \frac{7}{16}$

8. $\frac{3}{10} - \frac{1}{10}$

9. $\frac{36}{19} - \frac{30}{19}$
