

Dividing Fractions

Lesson 4 Name _____

- 1) Solve each problem listed below.
- 2) When done scan in the bar code to see if you are correct.
- 3) Every division problem can be rewritten as a multiplication problem. This is done by multiplying the dividend (the first fraction) by the reciprocal of the divisor (the second fraction).

1) $\frac{1}{2} \div 6 = ?$

2) $\frac{1}{9} \div 8 = ?$

3) $\frac{1}{9} \div 3 = ?$

4. $\frac{1}{5} \div \frac{2}{7}$

5. $\frac{1}{3} \div \frac{3}{4}$

6. $\frac{2}{9} \div \frac{3}{4}$

7. $\frac{1}{3} \div \frac{3}{4}$

8. $\frac{1}{7} \div \frac{1}{5}$

9. $\frac{4}{9} \div \frac{1}{2}$
