Dividing Fractions

Lesson 4

Name

- 1) Solve each problem listed below.
- 2) When done scan in the bar code to see if you are correct.
- 3) Every division problem can be rewritten as a multiplication problem. This is done by multiplying the dividend (the first fraction) bye the reciprocal of the ivisor(the second fraction).

1)
$$\frac{1}{2} \div 6 = ?$$

$$\frac{1}{9} \div 8 = ?$$

1)
$$\frac{1}{2} \div 6 = ?$$
 2) $\frac{1}{9} \div 8 = ?$ 3) $\frac{1}{9} \div 3 = ?$

$$4. \ \frac{1}{5} \div \frac{2}{7}$$

$$5. \ \frac{1}{3} \div \frac{3}{4}$$

4.
$$\frac{1}{5} \div \frac{2}{7}$$
 5. $\frac{1}{3} \div \frac{3}{4}$ 6. $\frac{2}{9} \div \frac{3}{4}$

$$7. \ \frac{1}{3} \div \frac{3}{4}$$

$$8. \ \frac{1}{7} \div \frac{1}{5}$$

7.
$$\frac{1}{3} \div \frac{3}{4}$$
 8. $\frac{1}{7} \div \frac{1}{5}$ 9. $\frac{4}{9} \div \frac{1}{2}$
