

Multiplying with Integers - 5

LESSON 5 NAME _____

1. Place the answer to each problem in the space provided
2. Scan in the QR Code to check your work
3. When you multiply two integers with the **same signs**, the result is always **positive**. Just multiply the absolute values and make the answer positive.

Positive x positive = positive
Negative x negative = positive

4. When you multiply two integers with **different signs**, the result is always **negative**. Just multiply the absolute values and make the answer negative.

Positive x negative = negative
Negative x positive = negative
