

# Dividing with Integers - 7

LESSON 7 NAME \_\_\_\_\_

1. Place the answer to each problem in the space provided
2. Scan in the QR Code to check your work
3. When you multiply two integers with the **same signs**, the result is always **positive**. Just multiply the absolute values and make the answer positive.

**Positive x positive = positive**  
**Negative x negative = positive**

4. When you multiply two integers with **different signs**, the result is always **negative**. Just multiply the absolute values and make the answer negative.

**Positive x negative = negative**  
**Negative x positive = negative**
