

Write an equation to express the total as the sum of equal addends
Problem 1

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

Use an array to solve. Problem 2

Color in the arrays and solve the word problems.

There are 5 rows of trees in the jungle. 4 rows of trees have 5 monkeys one in each tree. How many monkeys are in the trees?

Miss Crabtree lined her students up in 5 rows of 3 students. How many students does she have in all?

_____ monkeys

_____ students

Write an equation to express the total as a sum of equal addends.
Problem 3

Write the repeated addition sentence and solve each problem.

Jake helped his teacher organize her desk. He put the paperclips into 4 groups. Each group had 6 paperclips. How many paperclips in all?

There are 5 corrals on the ranch. Each corral has 5 horses. How many horses are there altogether?

Use repeated addition to solve multiplication facts. Problem 4

Write the repeated addition sentence that shows each multiplication fact. Solve each problem.

$$2 \times 8 = \underline{\quad}$$

$$\underline{\quad} = \underline{\quad}$$

$$4 \times 3 = \underline{\quad}$$

$$\underline{\quad} = \underline{\quad}$$
