

Understand the properties and relationship between multiplication and division. Place a line under the correct answer below. Problem 1

Use the array and inverse operation to find each unknown

$$\underline{\quad} \times 9 = 9$$

$$9 / 9 = \underline{\quad}$$

- a. 81    b. 1  
c. 9    d. 10

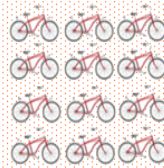

$$\underline{\quad} \times 7 = 14$$

$$14 / \underline{\quad} = 7$$

- a. 0    b. 2  
c. 1    d. 14

Understand the properties and relationship between multiplication and division. Place a line under the correct answer below. Problem 2

Use the array and inverse operation to find each unknown

$$\underline{\quad} \times 3 = 12$$

$$12 / \underline{\quad} = 3$$

- a. 3    b. 4  
c. 7    d. 12

$$\underline{\quad} \times 2 = 10$$

$$10 / \underline{\quad} = 2$$

- a. 2    b. 3  
c. 5    d. 10

Understand the properties and relationship between multiplication and division. Place a line under the correct answer below. Problem 3

Write a set of numbers for each family.

$$4 \times 6 = 24$$

$$6 \times 4 = 24$$

$$24 / 6 = 4$$

$$24 / 4 = 6$$

- a. 4, 6    b. 6, 10, 24  
c. 4, 6, 24    d. 4, 10, 24

$$3 \times 7 = 21$$

$$7 \times 3 = 21$$

$$21 / 3 = 7$$

$$21 / 7 = 3$$

- a. 3, 7    b. 3, 7, 10  
c. 3, 7, 21    d. 4, 10, 21

Understand the properties and relationship between multiplication and division. Place a line under the correct answer below. Problem 4

Write a fact family for each set of numbers

5, 8, 40

a.  $5 \times 1 = 5$     b.  $5 \times 8 = 40$   
 $8 \times 1 = 8$      $8 \times 5 = 40$   
 $40 \div 1 = 40$      $40 \div 5 = 8$   
 $40 \div 40 = 1$      $40 \div 8 = 5$

c.  $5 + 8 + 40 = 53$     d.  $5 + 8 = 13$   
 $8 + 5 = 13$   
 $40 - 5 = 35$   
 $40 - 8 = 32$

$$9 \overline{) 36}$$

- a. 8    b. 5  
c. 4    d. 1
