

HOME BUDGET LESSON

NOTE: This lesson is designed to be used in real life in the future allowing you to keep track of your income and expenses relative to your home.

- 1. Open up the Excel spreadsheet for home budget**
- 2. The outline on the spreadsheet was designed to allow you to enter numbers at a later time relative to you home life.**
- 3. We have placed several section that you will need at least for your home budget.**
 - a. The colors were only designed to allow you to see clearly the different areas**
 - b. We have placed the equation necessary to total up that area of the budge**
 - c. An example is to the right of the spreadsheet displaying the equation necessary to add up the total.**
 - d. The equation will adjust automatically when you enter in for numbers or insert more rows.**
 - e. If more total areas are necessary you may just simply add them and place the total equation at the bottom of the area. You may easy place a new color by highlighting the area and then use the bucket to chose a color if necessary.**
