"Creating Differentiated Lessons"

This course is designed to be completed in 12.5 hours or more depending on the difficulty of your lessons. You are required to create one (1) lesson. The lesson should contain all of your student's names and a power point slide with and adjusted problem dependent on the students understanding of the lesson. You will be provided with the startup section of the power point for choosing random names. You only need to add to this power point with adjust it with names of your students and an equal number of slides with problems.

This course is designed to provide you with an easier method of teaching and facilitating students that have problem learning. You will not have a face-to-face meetings or online chat sessions with this course. The website will provide you with all the instructions needed with an example and videos.

*You will be given several videos and the Random Power Point name generator. Please email me your phone number upon registering for the class. I will provide a call to clear up any questions you may have. Registration may take place at any time during the year. There is not a set beginning or end time. You must finish by the date we have posted on the Course web page. Teachers may choose to take (start) this class at any time prior to the ending date. The span of time needed to complete the course is normally **three** weeks from the date that you start the class. If you need more time just email me to adjust with you.*

*As a professional, you need to create a minimum of a power point lesson with at least 20 students. If you have less than 20 students then you need to create **two** (2) lessons.*
