

NOT THIS ONE

This course will allow you to make a presentation that is quick and easy and provide your students with a visual of what you are presenting to them.

*This course is designed to be completed in 12.5 hours or more depending on the difficulty of your lessons. You are required to create **FOUR (4)** lessons. The area of your lesson will be determined by what Math subject and grade level you are currently teaching. (Addition, Subtraction, Division, Multiplication, . Algebra). I do not now or ever ask an educator to create a lesson they will never use. You may wish to use this lesson in your classroom which will provide your students with an outstanding example of what they may do if you assign this to them to create on their own. This form of presentation is also an outstanding tool allowing you to demonstrate to your students many different ideas of thinking.*

This course is designed to provide you with an easier method of teaching and assist in facilitating lessons with students that have a problem learning. You will not have a face-to-face meetings or online chat sessions with this course. The website will provide you with all the instructions necessary with an example and videos.

You will discover over time that your students will be looking forward to this lesson allowing them to fully express what they have learned if they are going to create their own lesson.

Please email me your phone number, name of your school and grade level and subject upon registering for the class. I will provide a call to clear up any questions you may have. Registration may take place at any time during the year. There is not a set beginning or end time. You must finish by the date we have posted on the Course web page. Teachers may choose to take (start) this class at any time prior to the ending date. The span of time needed to complete the course is normally three weeks from the date that you start the class. If you need more time just email me to adjust with you.
