Multiplying with Integers-4

LESSON 4 NAME _____

1. **Place the answer to each problem in the space provided**
2. **Scan in the QR Code to check your work**

3. When you multiply two integers with the **same signs**, the result is always **positive**. Just multiply the absolute values and make the answer positive.

Positive x positive = positive
Negative x negative = positive

4. When you multiply two integers with **different signs**, the result is always **negative**. Just multiply the absolute values and make the answer negative.

Positive x negative = negative
Negative x positive = negative
